

Stainless-steel armor jacket

Santoprene food grade heavy duty hose

6 strands of polymer providing reinforcement and additional grip

Precision-crimped and machine verified to ensure leak resistant construction

Fits all brands of Pre-Rinse units

PRE-RINSE HOSES

At Fisher Manufacturing, we are committed to providing you with high quality, durable, and reliable plumbing solutions. The santoprene hose is no exception to that commitment, which is why it is guaranteed to last you longer than any other hose. Inside the stainless-steel armor, you'll find that our hoses are made of santoprene with 6 stands of polymer braided to the tubing exterior for reinforced strength and durability.

When you install Fisher, you install the best.

FEATURES AND BENEFITS

- **6 STANDS OF POLYMER BRAIDED TO TUBING**
Divides six strands into two groups of three, using a central core tubing to prevent the braid from flattening or collapsing.
- **TUBING REINFORCEMENT**
Adds structural integrity and grip to polymer tubing
- **SANTOPRENE**
A thermoplastic vulcanizate (TPV), it is essentially a high-performance elastomer that looks, feels, and behaves like rubber. It also provides a 30% weight reduction over rubber.
- **TENSION**
Constant tension on the strands to ensure the braid does not slip on the tubing.
- **100% FACTORY TESTED**
In both our modern in-house testing center and in actual field applications under extreme conditions. You get proven performance. Guaranteed.
- **CONNECTORS**
303 Stainless Steel
