

THE FISHER DIFFERENCE...

What makes our hose reels genuine? Fisher hose reels are the trusted choice for customers around the world because of their durability. These genuine Fisher Hose Reels are universally designed models that are available with the following mounting options: Ceiling, Wall, and Under Counter models in Stainless Steel or Powder Coated Construction Steel. Each Fisher Hose Reel offers these premium features:

#1 REINFORCED STEEL:

Powder coated steel reels are a robotically welded steel base that offers maximum strength and consistent quality. All steel components are powder coated for maximum corrosion resistance. The stainless steel reels' guide arm and base are stamped with ribs and gussets to ensure maximum strength and ultra-light weight.

#2 EXTRA PROTECTION:

Stainless steel reels feature a steel enclosure that offers an additional level of protection for the hose from potentially harmful foreign debris. These reels are designed such that removing the cover on either side will allow access to the majority of serviceable parts.

#3 FULL FLOW STRESS FREE SWIVEL DESIGN:

Both powder coated steel and stainless steel reels offer a full flow swivel that combines the highest- grade seal design and materials with bearing areas to ensure a maximum service life. The hose is plumbed into the base to eliminate the risk of undue stress on the swivel.

#4 QUIET SPEED LATCH:

The latch cam is designed for a reliable yet quiet operation.

#5 PRO SPRAY VALVE:

A shower head that produces up to 2.15 GPM and is guaranteed for 1 million cycles. NOT SUITABLE for removing food residue from food service items before cleaning them in commercial dishwashing or ware washing equipment.

#6 SPRAY GUN:

An adjustable spray trigger with a 7.0 GPM ergonomic design.

#7 3-PLY AIRCRAFT HYDRAULIC HOSE

Last three times longer.

When you choose Fisher Hose Reels from the start, you're trusting a brand that delivers real value with reliable, high-quality components designed to outlast cheaper alternatives. Instead of struggling with traditional hoses or mops and buckets, Fisher hose reels offer a more convenient, safer method for rinsing out equipment, washing down floors and cleaning heavy industrial debris. Fisher reel rinse units make water conveniently available in all kitchen areas.

75395

Open Reel 50' Hose Wall, Deck Floor, Under Counter Pro Spray Valve

75397

Open Reel 50' Wall, Deck Floor, Under Counter Spray Gun

OPEN OR CLOSED?

Open Reel allows visibility and easy access for cleaning. Closed reel keeps everything out of sight. This is purely client preference, giving you the flexibility to choose what's best for your facility.

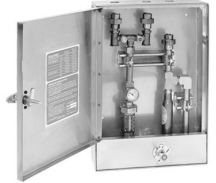

POWDER COATED STEEL CONSTRUCTION OR STAINLESS STEEL?

When choosing between Powder Coated Steel Construction and Stainless Steel, consider your environment. For example, environments with high humidity or high salt levels, such as those found in coastal areas or on cruise ships, make corrosion resistant stainless steel an ideal choice. Our Powder Coated Steel Construction is a less expensive alternative still provides long lasting durability.

WITH FISHER MANUFACTURING THERE ARE ALWAYS MORE OPTIONS TO CHOOSE FROM!

Simplify installation with Fisher's uniquely designed reel rinse control unit which combines all the necessary components into one complete system. Control valves and gauges are completely enclosed within a stainless steel cabinet with only three connections giving the operator total control that is tamper resistant.

Model 1801

Model 29475

This kit is ideal for new construction where the piping required for Reel Rinse Units is concealed within the wall. This kit consists of check valves, shut off and mixing valves, and an anti-spill pressure type vacuum breaker.

Model 28266

It's all part of our commitment to helping you create a highly functional, dependable hose reel system you can count on for years to come!
